Tuckahoe Creek Trunk Sewer Installation

Construction scheduled to be completed by spring 2026

Works & Utilities News

How Henrico prepared for Tropical Storm Debby

Crews worked hard to prepare county facilities and resources for Tropical Storm Debby.

Public Works visited flood-prone areas to clear drainage ditches and place signs to prepare for possible road closures. Public Utilities checked backup pumps and generators in case they were needed to maintain water and sewer service.

Public use areas are open daily to receive yard waste

Did you know that you can drop off any residential yard debris or waste

for free at one of the county's two public use areas?

These disposal areas, located on Charles City and Springfield roads, are open from 7:30 a.m. to 7 p.m. every day, excluding major holidays.

Your yard waste will be processed into mulch, so it's **important** that anything dropped off does not include garbage, plastic or other materials. The mulch is free to all residents for pickup from the disposal areas.

Take your
YARD DEBRIS
to our public use areas!

Residents encouraged to practice mosquito control

The Public Works Environmental Services Division's mosquito team monitors and tests mosquitos each summer looking for disease. The team recently detected the West Nile Virus in mosquitos in Henrico earlier than usual.

Residents are encouraged to take extra precaution to prevent bites. Use an [EPA-approved repellent](#), wear loose-fitting long sleeves and pants, and reduce time outdoors at dusk.

Henrico residents can schedule a [free inspection](#) with the mosquito team to locate potential mosquito breeding sites on their property. The U.S. Centers for Disease Control and Prevention also has [guidance](#) on preventing bites.

Volunteers needed for project to promote clean waterways

Henrico's Environmental Action Resource Team (H.E.A.R.T.) is partnering with the James River Association and the Henrico Public Works Environmental Services Division to "Paint Out Pollution." Volunteers will be

painting stenciled wildlife artwork on storm drains at various county locations to promote clean waterways in the community.

H.E.A.R.T. has set a goal of stenciling five locations in three days. Please lend a hand (or maybe a spray can!)

Public Utilities continues testing at Cobbs Creek Reservoir

Almost two decades in the making, Cobbs Creek Reservoir is in the final stages of testing!

This \$280 million project, located in Cumberland County, will secure the drinking water needs of Henrico's residents for decades. During heavy rain and other wet times of year, the pumps will pull water from the James River into the reservoir, providing Henrico County with up to an additional 47 million gallons per day than what it currently uses. When the river is at lower levels due to drought or dry weather, the reservoir will release the water back into the river to help maintain river levels for aquatic life and supply the drinking

water for Henrico and other localities.

Later this year once testing is complete, Public Utilities will place the reservoir into operation. Stay tuned for more information!
